## name brand purses for cheap

June 28, 2023: The North Carolina legislature has revived discussions regarding establishing a racing commission with the long-term goal of building horse track

March 3, 2023: According to data from GeoComply, North Carolinians are ready for mobile sports betting options.

We just have to see.

After removing college sports betting and passing SB 38 by a vote of 51-50 on t

he House floor, lawmakers vote against SB 688 by the same margin.

Several steps still remain before either bill can become law.

Still, tweaks to SB 688 and/or HB 361 are inevitable.

Dec.

Roy Cooper officially signs S 154 into law, legalizing sports betting in North Carolina.

Less scrupulous publishers sometimes take the next step, creating pseudo news st ories rife with half-truths or outright lies that are tailor-made to emotionally target audiences already inclined to believe them. Indeed, much of the bogus US political items generated during the 2016 election didn't emanate from Russ ian agents, but fly-by-night operations churning out spurious fodder appealing t o biases across the political spectrum. Compounding this problem are the high co sts to Facebook as a corporation: It's likely not feasible to hire massively large teams of fact checkers to review every deceptive news item that's adv ertised on its platform.

I believe there is a better, proven, cost-effective solution Facebook could implement. Leverage the aggregate insights of its own users to root out false or deceptive news, and then, remove the profit motive by charging publishers who try to promote it.

Facebook is in an even better position to implement a system like this, since it has a truly massive user base which the company knows about in granular detail.

They can easily select a small subset of users (several hundred thousand) to co
